HERD LIST OPTION

_____**Yes send me a herd list before downloading my records onto a diskette.** A list of all animals the Association shows to be owned by your member code(s). When you receive this list you can mark "Cancel" next to the animals which you no longer wish to include in your herd. After returning this list to the Association, we will update your records before processing the information onto a diskette.

HERD RECORDS OPTION

HERD RECORDS OPTION: Obtaining your herd records is optional and there is no additional cost for your first download (future downloads are normally not necessary and cost $25). The records will include all active registered animals plus the animals necessary to fill out a three-generation pedigree, animals weighed for AHIR in the last five (5) years and all registered progeny of active animals.

CRYSTAL REPORT WRITER

Crystal Report Writer (CRW) is a third-party software package that allows you to change existing AIMS reports and/or create your own reports from scratch. It greatly expands the power of herd recordkeeping software, however, CRW is not required to run the built-in AIMS reports.
